One reason is that it is usual

ly difficult to model a variable which has restricted range,

as probability. This transformation is an attempt to get around the rest

stricted range problem. It maps probability ranging between 0 and 1 to lo

g odds ranging from negative infinity to positive infinity.

Odds and probability are both used

to express the likelihood of an event occurring in the context o

f gambling. Probability is expressed as a percentage chance, while

odds can be presented in a few different formats, such as a decimal, fr

action, or moneyline.
