&lt;p&gt;&lt;/p&gt;&lt;p&gt;This article is about the continent. For other uses, see Europe (disambiguation)&lt;/p&gt;  
&lt;p&gt;Europe is a continent[t] located entirely in the Northern&#127815; Hemisphere and mostly in the Eastern Hemisphere. It is bordered by the Arctic Ocean to the north, the Atlantic Ocean&#127815; to the west, the Mediterranean Sea to the south, and Asia to the east. Europe shares the landmass of Eurasia&#127815; with Asia, and of Afro-Eurasia with both Asia and Africa.[10][11] Europe is commonly considered to be separated from Asia by&#127815; the watershed of the Ural Mountains, the Ural River, the Caspian Sea, the Greater Caucasus, the Black Sea, and the&#127815; waterways of the Turkish straits.[12]&lt;/p&gt;  
&lt;p&gt;Europe covers about 10.18 million km<sup>2</sup> (3.93 million sq mi), or 2% of Earth&#39;s surface (6.8%&#127815; of land area), making it the second-smallest continent (using the seven-continent model). Politically, Europe is divided into about fifty sovereign&#127815; states, of which Russia is the largest and most populous, spanning 39% of the continent and comprising 15% of its&#127815; population. Europe had a total population of about 745 million (about 10% of the world ) Tj T\* BT /

European climate is largely affected by warm Atlantic currents that temper winters and summers on&#127815; much of the continent, even at latitudes along which the climate in Asia and North America is severe. Further from&#127815; the sea, seasonal differences are more noticeable than close to the coast.&lt;/p&gt;  
&lt;p&gt;European culture is the root of Western civilisation, which&#127815; traces its lineage back to ancient Greece and ancient Rome.[13][14] The fall of the Western Roman Empire in 476 CE&#127815; and the related Migration Period marke
